Instore Theater

The easy to install paper and electro labelling solution!

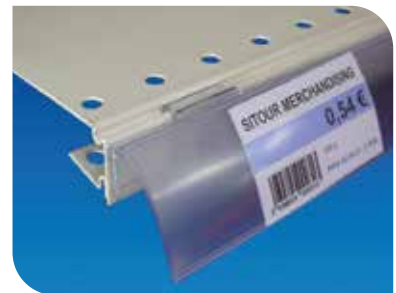

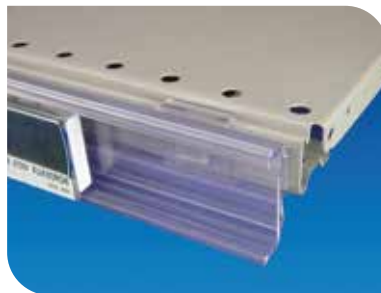

EASYFIX: THE SITOUR MERCHANDISING PATENTED ATTACHMENT SYSTEM

Two versions are available:

- > **Paper profile** (height: 39 mm; various lengths available; white or clear)
- > **Electro labelling rail** (for Pricer labels; various lengths available; clear)

Easy to install

- > **On shelves with 25 mm spacing:**
 - insert directly on the rail without need for any additional parts (patented by Sitour)
- > **On clips:**
 - for Tegometal, Double wire, Cefla, Kider KS, Fresh Bonnet Neve and Fresh Linde shelves

Suits to all types of food areas!

Modular

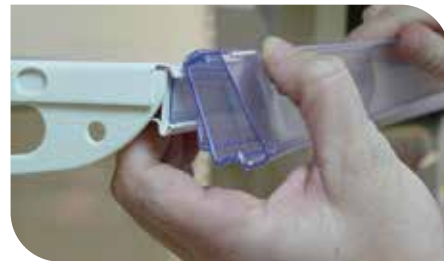

> Communication (paper and electro version)

- 31 mm decorative strips
- Shark feet, e-pop clips
- Shelf talkers, Coupon holders

> Hinged cover: easy to install (electro version)

- Decorative
- Hyper clear
- Remains fitted on the labelling rail when opened

> Reading angle management via tilt spacers positioned on the back of the labelling rail (electro version)

- Spacer ref. 252 699
- Reading angle of 40°

Multi-purpose (electro version)

> Suitable for 3 generations of Pricer labels: Promoline, Continuum, Dot Matrix DM3370 Smart TAG

- Easy to insert
- Stable
- Easy to read (possible angle management)
- Protection (compatible cover)

... may we help you ?

THE RIGHT LABELLING SOLUTION EXISTS FOR EACH FIXTURE

P25 METAL FIXTURES *

- The Easyfix solution (Electro labelling rail or paper profile) can be fitted directly onto the shelf rail.
- The Freeline solution: 1 Freeline profile per P25 shelf type + individual paper or electro label holders.
- Individual P25 label holders (electro or paper).

TAGOMETALL FIXTURES

- The Easyfix solution (Electro labelling rail or paper profile) + the Temag Easyfix clips.
- The Freeline solution: 1 Tegometall Freeline profile + individual paper or electro label holders.
- Extruded paper Tegometall label holder profiles, can be clipped directly onto the shelf rail.

STRAIGHT EDGE FIXTURES

- The Freeline solution: 1 adhesive Freeline cap profile + individual paper or electro-Freeline label holders (P 20-21 or screw-on solution, contact us).
- The adhesive Electrorail solution, which can be applied directly as a shelf cap.

GLASS SHELF FIXTURES

- The Freeline solution: 1 pinch Freeline solution + individual paper or electro Freeline label holders.
- Pinch paper label holders.

WOODEN SHELF FIXTURES

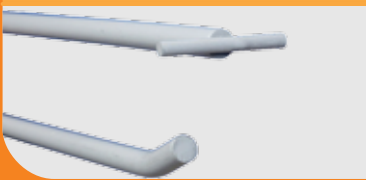

- Folded or extruded adhesive paper label holder profiles.
- Pinch paper label holders.

DOUBLE WIRE SHELF FIXTURES

- The Wire shelf paper label holder profiles.
 - The Freeline: 1 Freeline profile + wire shelf clips + Freeline Easyfix solution (Electro labelling rail or paper or electro Freeline label holders (contact us).
- For single wire shelves and wire baskets, opt for the pinch solution.

PEG HOOKS

- Paper and electro peg hook label holders

Created and patented by Sitour Merchandising. It is comprised of a labelling profile (electronic labelling rail or paper labelling profile) that is inserted directly into the C slot of fixtures with 25mm spacing (Hermès 25, Alser/Lafortezza 25...). Thanks to its range of adapters, can be used with other fixtures in the market (Cefla/kider KS, Tegometall, Linde & Bonnet Neve in the chilled food area).

**Easyfix paper label-holder profile**

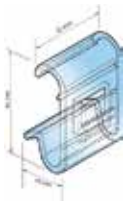

new

Designed to be fixed directly onto 25mm spacing shelves (Hermès 25, Alser 25 et Kider 25). For paper labels 39mm high. Extruded profile available in different lengths on demand. In PVC.

... did you know?

Ideal for traditional chilled counters (dairy, catering, butcher or seafood) that offer little space for communication, the Label First offers a flexible solution for price display.

Hyper-compact First label is 20% smaller and its digits are 10% larger than a traditional label with crown.

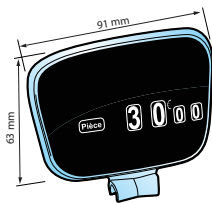

Label First is available in 2 sizes:

- The classic Label First with 5 crowns
- The Large label First with 6 crowns (that allows to communicate on 6 figures prices).

The face of the Label First is customizable and can be changed.

First label, black edition

AUTOMATIC FACING MANAGEMENT

Normal configuration:

Choose the force and size of the pusher according to the size, weight and shape of the product packaging!

Gravity configuration :

Gravity: There are different degrees of gravity:

- > Low (10°) for example for Easyroller
- > Highly pronounced (30°) for example for chocolate or bags of sweets.

Gravity can be expressed in two ways:

- > inverted gravity, i.e. the shelf is angled towards the rear; this gravity is often installed at the bottom of fixtures.
- > traditional gravity, i.e. the shelf is angled towards the front; this gravity is often installed at the top of fixtures.

Finally, traditional gravity can be installed in 2 different ways:

- > «Caught» gravity, i.e. when the accessories for organising the shelf are positioned in such a way as to catch a vertical line as facing despite the tilt on the shelves.
- > «Non-Caught» gravity, i.e. when the accessories for organising the shelf are positioned in such a way as to allow the products to exceed the vertical line with a tilt on the shelves.

...how does it work?

R

SPRING PUSHERS

For a tidy shelf and facings!

The pusher is the guarantee of an automatic adjustment in terms of facing each time a product is taken.

It ensures:

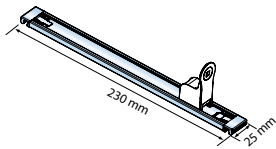

- Permanent facings
- Quick identification of ruptures in stock,
- Tidy shelf presentation.

The spring pusher is also:

- A secure spring in the back support
- A bottom plate that can be customised
- A guarantee to be fastened on any type of rail

Low-strength spring pusher

Automatically adjusts the facings for light packaging (< 100 g) towards the front of the shelf. To be fixed in divider rail at the front and the back of the shelf.

- Force 3 N. PVC rail - ABS endcap - POM back support

Customisable extension for pusher

Enlarges the size of the pusher in order to push larger packagings. Fits onto the pusher with a snap fastener or fixing rivet (page XXX). Can be customised on demand. PVC.

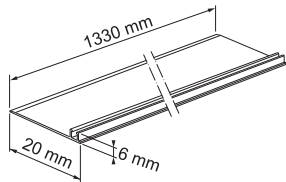

124 431	Customizable extension for pusher	Per 20
----------------	-----------------------------------	--------

...how does it work?

To obtain a gravity shelf, use 10° or 30° gravity brackets (2 brackets per shelf). It is therefore possible on 1 element to place only one or a few gravity shelves and to leave the others in horizontal configuration. With shelves in gravity configuration, whether or not caught, all of the weight of the products is mechanically transferred to the front of the shelves and therefore is supported by the stop rail. It is therefore indispensable to provide gravity shelves with robust and well-fastened accessories. Discover our range below!

Gravity adhesive rail

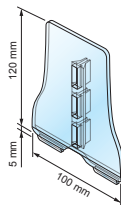

Maintains dividers on shelves in gravity configuration. Large base with double adhesive tape. Recommended use at the front and rear of the gravity shelf. Add REVERSO individual front stops. PVC.

AUTOMATIC FACING MANAGEMENT!

Positioned on a shelf with an angle of 10°, Easyroller is comprised of plates that can be assembled together and are fastened by a front rail in which a stop rail is inserted which maintains the products. At the rear another rail meets the plates and holds the device. Easyroller dividers allow the products to be separated from each other and to be guided towards the front of the shelf. Easyroller adapts to most shelf widths and depths. Available in kit (1 kit = 1 shelf) or per unit.

Easyroller kit 1330mm

Encourages products to slide to the front of the shelf in gravity configuration. Includes several modules to be assembled for a shelf 1330mm long, a front rail with a stop rail 80mm high and a rear rail. Available for different shelf depths. Available in grey or black (recycled materials).

124 705	White - Depth 500mm	Per unit

...how does it work?

Bulk also dry products (more or less small) to be sold as self-service, thus letting the customer choose the quantity and assortment. Bulk is expressed as sales surface by the equipment of a fixture (standard or customised) with hoppers and/or bins with scoops (or tongs) fastened to the fastening accessories (shoes, bases, shelves, loading tube). In order for this area to stay clean, a recovery bin has to be added under each row (in order to prevent products from falling on the floor) and to correctly delimit the area with effective signage (front signs, dome, stickers on the ground, etc.) and instructive communication (...how does it work?).

8-litres hopper

Offers self-service for products. Pouring spout with handle for bulk products. Holds 8 litres. FIFO system. Copolyester without Bisphenol A.

127 739

Width 10cm, height 53cm, depth 28cm (without base)

Per unit

13-litres hopper

Offers self-service for products. Pouring spout with handle for bulk products. Holds 13 litres. Available in 2 widths. System Copolyester without Bisphenol A.

127 755

Width 15cm, height 53cm, depth 38cm (without base)

Per unit

127 753

Width 15cm, height 53cm, depth 38cm with stirrer

Per unit

127 731

Width 10cm, height 68cm, depth 34cm (without base)

Per unit

19-litres hopper

Offers self-service for products. Pouring spout with handle for bulk products. Holds 19 litres. FIFO system. Copolyester without Bisphenol A.

127 751

Width 15cm, height 61cm, depth 28cm (without base)

Per unit

...did you know?

Bin range with a pouring spout and handle to serve the products simply and hygienically. The entire range of bins is 100% compatible for food use, made of copolyester - a highly resistant and transparent material - no Bisphenol A guaranteed!

...how does it work?

THE EASYFACING

AUTOMATE FACING MANAGEMENT!

Easyfacing is a merchandising device for chilled, cold and dry fixtures that makes it possible to optimise the number of product facings, manage the section and commercial performance. - It is installed in almost all vertical chilled and cold fixtures. - The system can equip the fixture entirely or partially. - It is comprised of plates installed on loading tubes. - The plates are equipped with a pusher that ensures the product moves forward to the stop rail and as such guarantees automatic facing management, and therefore shelves that are always clean. The plates are available in different formats with varying pusher strengths in order to better adapt to the shape and the size of your packagings.

PRODUCT BENEFITS OF EASYFACING

- 1 > **ERGONOMIC:** Easy facing is both easy to install (on loading tubes) and easy to use (products are loaded from the front, automatic management)
- 2 > **FLEXIBLE:** Easyfacing adapts to most fixtures in the market and to most of the product packagings (choice of length and width, stop rail, pusher strength)
- 3 > **ESTHETIC:** It enhances the products (display on the side for product presentation as facing) and guarantees a tidy shelf at all times of the day (automatic facing management)
- 3 > **COMPLIES WITH HYGIENE & SAFETY RULES:** Easyfacing allows for good circulation of the cold air curtain as well as simplification in managing product rotation (Use-by date).

ADVANTAGES FOR YOU AND YOUR CUSTOMERS

Easyfacing is therefore:

- 1 > Simplification of the work of the section managers and optimisation of management costs
- 2 > Guarantee of a constantly tidy shelf and therefore increased product visibility
- 3 Customer satisfaction and growth in the sales of the segment!

R

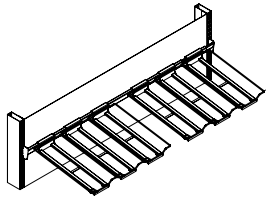

THE FROZEN FIXTURE CONCEPT WORK, PRODUCT VISIBILITY GUARANTEED!

The Sitour Concept for Frozen fixtures offers:

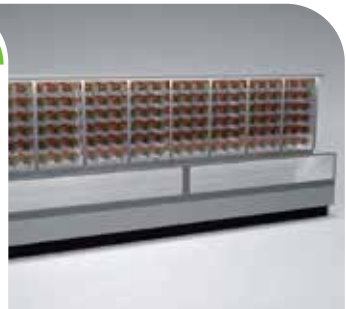

- > **Product visibility:** ice cream is presented as facing, the offer is clarified and comprehensive.
- > **Automatic facing management:** the slight gravity of the peg-hooks allows the ice cream to automatically move down towards the front to the stop rail which gives the impression of a full shelf all day long.
- > **Flexibility:** compatible with shark type fixtures as well as chest type fixtures
- > **Hygiene & safety:** Free circulation of air and reduction in the formation of frost.
- > **Simplicity:** quick assembly and accessible to all (peg-hooks with slight gravity on loading tube)!

Shark ice cream fixture kit

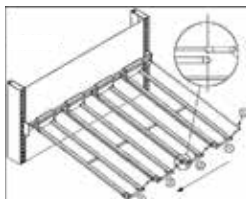

Designed to present ice cream as facing in a shark fixture and to guarantee constant product visibility. Kit comprised of 30 peg-hooks (6 bins deep) + 5 loading tubes.

R

THE ROUND PACKAGING CONCEPT WORK, PRODUCT VISIBILITY GUARANTEED!

The round packaging concept is an innovative concept comprised of arms positioned on a sliding structure. It offers:

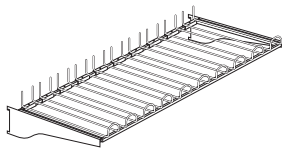

> **Product visibility:** the products are positioned on the side, as such offer perfect visibility of the product facing for the customer. The offer is clear and comprehensive (+40% of facings), the shelf is more attractive (+20% in sales) and there are less management costs.

> **Flexibility:** This concept adapts to most cold fixtures (equipped with racks with 25mm spacing).

> **Hygiene and safety:** This concept guarantees free circulation of the air curtain and simplified maintenance, and better-managed rotations (telescopic drawer).

Telescopic shelf for round packaging

Presents round packaging as facing and facilitates maintenance. Set comprised of a telescopic frame and 10 modular arms. Fits with most cold fixtures. Metal.
